Evidence Summary

The ID Register has been designed as an online portal where your individual investors, corporates and institutions can create and maintain profiles containing Client Due Diligence (CDD) information for the purpose of sharing that information with others.

In order for these profiles to be relevant, The ID Register also requires individual investors, corporates and institutions to upload evidence documents supporting the information populated in their profiles. This guide will explain how to do this, what documents you are recommended to use and how documents can be certified electronically using The ID Register.

Profile Evidence Section

This is an expandable section which will list the evidence requirements for the profile and can be found below the 'Profile Details,' 'Address' and 'Due Diligence Sections.' See Appendix 2 for the specific requirements and documents.

Evidence Requirements

Your profile's evidence requirements are determined by rules which take into account the following:

- Profile Type
- Details entered into the 'Due Diligence' section of the Profile and
- Indicative Risk Factors of the Profile

The ID Register requires you to populate the profile with all relevant details in order to best determine the Evidence Requirements. Please ensure you have entered the information accurately to ensure the correct evidence requirements generate. This will minimise further requests for CDD.

Evidence Upload

- The ID Register accepts the following types of documents (bmp, doc, docm, docx, gif, jpeg, jpg, pdf and png)
- There is a **2000KB** file size limit for each document uploaded.

All documents are virus scanned when uploaded. Non PDF documents are converted to PDF.

To upload evidence against the relevant field, expand the 'Evidence' section and click on the  button

Clicking the button will display the following:

1. **Upload** – Clicking this will open a browser window. Where you can navigate to and select the document to be uploaded

The ID Register should have evidence provided for each 'Required' item. If you do not have a document that meets the requirement please inform The ID Register.

Evidence Certification

Required		
Title	Explanation	Upload
Passport	Please provide a certified copy of your passport	Upload Document ▾
<input type="checkbox"/>	TEST.pdf	Requires certification Expires Not set ✘

Once the evidence document has been uploaded you will see the document and its current certification status.

The ID Register allows you to request the electronic certification of your documents through the site. This feature has been made possible by recent developments in EU law which allows institutions to accept electronically certified documents and gives electronic certification the same recognition as a physical certification

Suitable Certifiers

The ID Register enables you to submit the Certification request to any valid email address. However, in order for a certification to be valid you **MUST** send the request to a suitable certifier.

Suitable Certifiers include:

- A director, officer or manager of an institution operating in a financially regulated jurisdiction;
- An accountant who is a member of a recognised professional body;
- A company secretary who is a member of the Institute of Chartered Secretaries and Administrators;
- A lawyer or notary public;
- An actuary;
- An embassy, consulate or high commission of the country of issue of the document; or
- A member of the judiciary, a senior civil servant, or a serving police or customs officer.

Certification Process

Title	Explanation	Upload
Passport	Please provide a certified copy of your passport	Upload Document ▾
<input checked="" type="checkbox"/> TEST.pdf		Requires certification Expires Not set

To certify a document click on the tick box to the left of the document.

At the bottom of the 'evidence' section click on the [Certify selected items ▾](#) button

The button will show the follow option:

1. **Send a Certification Request** – This will open a pop up window requesting the following:
 - a. **Name** – Name of the certifier
 - b. **Relationship Type** – The profile's relationship with the certifier
 - c. **Email** – The certifiers email address
 - d. **Notes** – Any notes you would like to include for the request
 - e. **Organisation** – The organisation the certifier works for

Once you have entered the required information click "Request Certification" and an email will be sent to the certifier. This email will contain a link to the "Evidence Certification Screen.

External certifiers do not need to be a user on The ID Register for the link to work. The link will expire after 3 days. If it is not used in this time it will expire and will need to be resent.

IMPORTANT: If the documents requiring certification relate to your personal profile, or that of a relative. For example a passport or utility bill. You MUST NOT certify this yourself. Any such certifications will be rejected by The ID Register.

Evidence Certification

Dummy Passport.pdf

I certify that the document is a true copy of the original document which I have seen or is before me, and that I have met the person and the photograph is a true likeness of the individual.

I certify that the document is a true copy of the original.

I am unable to certify this document as a true copy for the following reason:

Dummy Utility Bill.pdf

I certify that the document is a true copy of the original document which I have seen or is before me.

I certify that the document is a true copy of the original.

I am unable to certify this document as a true copy for the following reason:

The certifier is then taken to the Evidence Certification page. This provides;

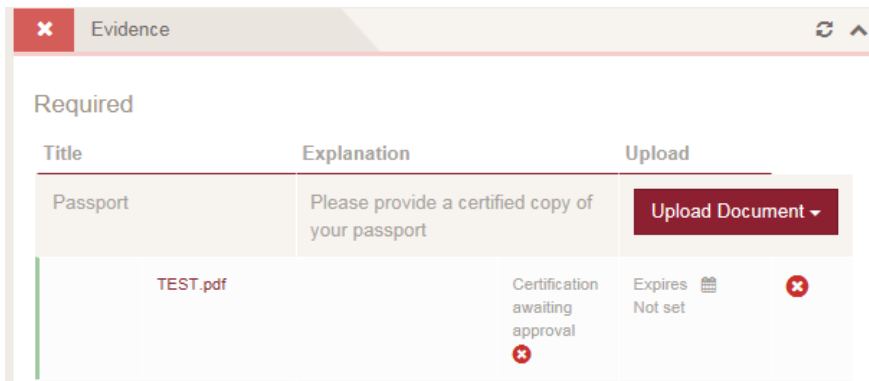

- A link to each document for the certifier to review and;
- A Button to select either:
 - **Certify the document as a true copy which has been seen** – This option is used to certify all evidence which requires a formal certification. (e.g. a Passport, Utility Bill, Certificate of Incorporation or Register of Directors)
 - **Certify the document as a true copy** – This option is used to certify documents on the ID Register sourced from the public domain or where they would not normally require a certification (e.g. a W-Series Form, CRS Self Certification Form or extract from a Regulators website)
 - **Unable to Certify** – With a drop down menu giving a reason (e.g. this document has expired) and a text box for any further information.

Once the certifier has completed reviewing the document and they are satisfied with their response(s) they click  at the bottom of the page.

This will complete the Certification process for the Certifier and they can close the window.

The email link sent to the certifier will no longer work after this process has been completed.

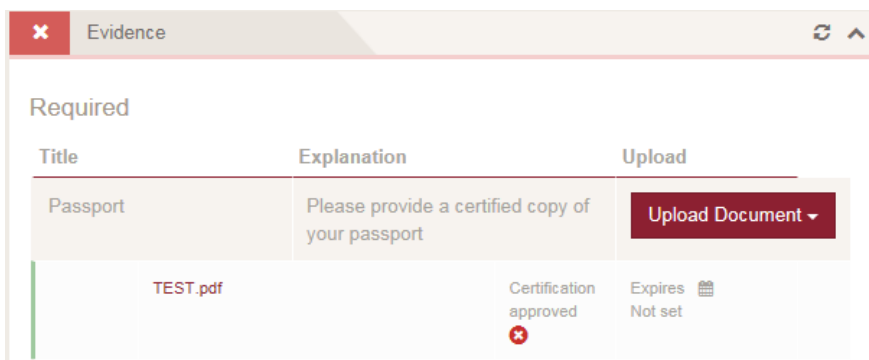

Certification Approval

The screenshot shows a web interface titled 'Evidence' with a 'Required' section. It contains a table with three columns: 'Title', 'Explanation', and 'Upload'. The first row is a header for the required document. The second row shows a document named 'TEST.pdf' with a status of 'Certification awaiting approval' and an expiry date of 'Not set'. A red 'x' icon is present next to the status.

Title	Explanation	Upload
Passport	Please provide a certified copy of your passport	Upload Document ▾
TEST.pdf	Certification awaiting approval	Expires Not set

Before the certification is applied to the document it is first reviewed and validated by The ID Register. This can take up to 2 Business Days.

The screenshot shows the same web interface as above, but the document 'TEST.pdf' now has a status of 'Certification approved'. The red 'x' icon is no longer present.

Title	Explanation	Upload
Passport	Please provide a certified copy of your passport	Upload Document ▾
TEST.pdf	Certification approved	Expires Not set

Once approved, the certified document will be active in the profile. An expiry date is recorded against each document. The ID Register will send the profile owner a reminder 30 days before the document expires to refresh your evidence.

The digital certification is a tamper proof, electronic signature which comprises of a certification details cover page with a time & date stamp watermark on the relevant pages.

The tamper proof element comprises of a digital certification of the document which, should someone try to edit or change the file will highlight that a change has been made and cause the document to become invalid.

Digital Certification

Almost all worldwide jurisdictions have recognised the validity of digital signatures since the early 2000s. Cayman (The Electronic Transactions Law,2000), Luxembourg (The Grand-Ducal Regulation of 1st June 2001), UK Financial Crime Guide for example. Recent changes in the handbooks of Guernsey (Handbook annex 2015) and Jersey (Handbook update 2016) for example make explicit the regulators’ support for digital signatures in the KYC process. Documents on the ID Register are certified using a digital signature. The table below shows the common requirements for this process in the legislation referenced above, together with others.

Legal Requirement	Paper-based problems	Solved by The ID Register
Only the signatory can create their signature	Can your children passably sign your signature? How often do we check that the notary's stamp is real?	We store the email address used by the signatory, their IP address, name, address, telephone number, professional accreditation and their fully validated ID Register profile, if applicable. We also contact new accreditors by telephone and reconfirm their certifications periodically thereafter.
The signatory understands the reason for which the document is being certified	No evidence of this explanation is retained on the signed document.	This is explained in the certification email and on the certification screens.

Regulatory support for digital signatures therefore both reduces the cost and increases the effectiveness of certification.
